

10 most frequently asked questions concerning the EQUILIBRIX Connect game

Firstly, I would like to thank to all of you, who plucked up the courage to try my unusual game and who were not shy to ask about various things. Since the questions were meaningful and many of them have repeated frequently, I have decided to put following help at your disposal – expressed by modern language: TOP 10 FAQ=)

1. Am I allowed place a stone to the stones of different colour?

No, you can't. A newly born stone has to be always connected with a maternal stone of the same colour.

2. Is it possible to carry out "The Birth" directly from the basis?

No, the bases only define points which have to be connected.

3. Am I allowed to place a stone on the surrounded field?

Yes, it is not only allowed, but also recommended, because this kind of position is quite safe. Surrounding is not evaluated retrospectively, it is possible just in the moment the attacker creates the surrounding formation in his turn.

4. What if I run out of stones?

You can carry out a reverse action anytime during the game and you can take back one stone back to your stock instead of placing the stone on the field.

5. How many dice should I roll as a bonus for the surrounding?

You play with one dice – that one which has been just used for placing the attack stone. However, you don't roll the dice again, the following action will be carried out by using the same position rolled on the dice.

6. Am I allowed to surround my own stone?

No, the player can't take part (not even with one stone) in his own surrounding.

7. Do I gain more actions for surrounding more stones?

No, you always gain just one action as a bonus. The aim of the bonus actions is to compensate the dice used for another purpose than connecting bases.

8. Do I cut off a connection of other player, if I cross it with my connected stones?

No, the connection of stones is completely independent of a neighbouring situation on the playing field.

9. Am I allowed to place a stone on the playing field which has been taken to my stock right now by using the reverse action?

No, you take back the stone to your stock and that means the dice is used.

10. Should I give the surrounded stone back to the owner?

Yes, there are no captives in the game.
